I will check if I can log in to the application using a simple SQL query without knowing the correct login and password.
Because I managed to log in this way, I reports an error.

Title: The user can log in without providing a login and password - using SQL Injection.
Priority: Highest

ENVIRONMENT:
https://juice-shop.herokuapp.com/#/
Production

BROWSER / Mobile OS Version:
Chromium Wersja 132.0.6834.84
